PRESS RELEASE

Neuilly-sur-Seine, France – December 10, 2020

Bureau Veritas launches *ChargeScan by BV*, an end-to-end solution for Electric Vehicle Charging Stations (EVCS)

With *ChargeScan by BV*, part of BV Green Line, clients will be able to access verified data all along the asset lifecycle to ensure the reliability of their EVCS network

Bureau Veritas, a world leader in testing, inspection and certification, unveils a complete portfolio of services dedicated to Electric Vehicle Charging Stations (EVCS), covering the full lifecycle – from design, construction and commissioning to operations.

With *ChargeScan by BV*, clients will be able to rely on real-time information verified by Bureau Veritas inspectors on the ground. They will be able to take immediate action to ensure that their charging stations are compliant, always available and fully functional for end-customers. This information can be embedded into the client's existing digital platform, or on a customized digital hub developed by Bureau Veritas.

Renato Catrib, Senior Vice President Global Service Lines, Bureau Veritas, commented:

"New Mobility is one of the pillars of Bureau Veritas Green Line, a wide range of sustainability services and solutions, enabling our clients to address growing challenges in this field. ChargeScan by BV brings trust and transparency to our clients, giving them full visibility of their EVCS network during both construction and operations. We enable them to take immediate action, based on reliable information from Bureau Veritas experts. Through this new solution, we are proud to contribute to the development of electric mobility and set the course for a new era of sustainable development".

The end-to end solution covers:

- **Project management assistance for charging stations under construction:**
 - Consulting services for preliminary studies
 - Technical support and document management for design and permitting phases
 - Management assistance for construction, permitting and commissioning
 - Training for product and installation

- **Inspection services for charging stations in operations:**
 - Regulatory compliance (regulatory and maintenance inspections, grid code compliance...)
 - Safety and security reviews
 - Network availability (condition monitoring and assessment, repairs & component replacement management)
 - Performance monitoring (commissioning, data management, performance testing etc.)
 - Wireless connectivity testing
