

# PEST AND SANITIZATION MANAGEMENT BY BUREAU VERITAS

---

**BUREAU  
VERITAS**

## WE USE ONLY CIB (CENTRAL INSECTICIDE BOARD) APPROVED CHEMICALS

Organization's emphasis on Safety and Hygiene has further gained importance in the world effected by various infectious diseases.

Macro and micro organisms can be carriers of deadly diseases. Utmost care needs to be taken to deter transmission of infectious diseases.

Bureau Veritas Pest management and Sanitization service is characterized by being effective, genuine, result oriented, client customized and adhering to Industry standards.

### Need for Pest and Sanitization Services

Focusing on control programs can go a long way in maintaining the customer recall for a brand and deems its products safe for consumption by customers.

#### Key consideration for organisations

- Deactivate virus residing on plant door knobs, carpeted floor, rugs, drapes, work stations, desks, chairs, office cutleries, seating areas, taps, cleaning equipment, photocopy machines etc.
- Other areas to sanitize: laptops, kitchen platforms, utensils, floors, furniture's, gyms etc.
- Pests eating the food in shops and storage. Pests infecting food with droppings, urine, filth.
- Rodents reservoirs for several mosquito-borne ailments and harming machines/equipments

**Deterring the growth of pests & microorganisms and deactivating any existing exposure is the key aspect of a control process.**

## OUR APPROACH

Missions are performed in accordance with our internal procedures which are compatible with those set up by international standards or professional organizations. They can be briefly described as follows:

### SCOPE DEFINITION

The client defines the framework and scope of the Pest & Sanitization Management with Bureau Veritas. This can include the specifications of the Industry / are to be Pest Management, the issuing of a specific check-list and the definition of our mission. The reporting format is agreed with the client in order to meet expectations.

Once the scope of mission is defined, Bureau Veritas allocates experienced Technicians to attend on site according to Fumigate order including all required information (specifications, check-list etc.).

### Characteristics of Bureau Veritas Programme

- Usage of high quality chemicals
- Systematic program of long term pest control and sanitized environment
- Pesticides use on client need, type, amount and usage location.
- Major emphasis on prevention of pest problems
- Validation through microbial sampling of environment and food contact surfaces
- Major purpose of most site visits is to inspect and monitor
